

**Notice of Summer Travel Survey  
Highway 26 Transportation Study  
Georgian Triangle Area  
W.O. 07-20008**

**Study Purpose**

The Ontario Ministry of Transportation is undertaking a study to update current and future travel activity in the Highway 26 Georgian Triangle area to determine short and long term transportation network needs.

**Analysis Area**

**Travel Pattern Survey**

This study includes surveys of existing travel patterns. A winter survey, which was completed in March 2009, included interviews at various ski resorts in the area.

A summer survey, to be undertaken during the months of July and August 2009, will include roadside interviews conducted at 13 different locations including Highway 26 and municipal roads within the analysis area. Surveys will be conducted on weekdays and on a number of Sundays during this period, excluding long weekends. This is a voluntary survey and no personal information will be requested. However, if you are approached for an interview, we would greatly appreciate your participation, as this survey will provide critical information regarding travel patterns in the analysis area that will assist in determining future improvement needs.

**Consultation**

A study website has been set up to provide additional details on the progress and results of the study and to collect comments. One round of public information centres is planned for the Spring 2010 to share study findings and seek feedback on recommendations. Details of these public information centres will be advertised on the study website, through public notices placed in area newspapers, and to all who have requested to be placed on the study mailing list.

**Contacting the Study Team**

For further information, or to be placed on the study mailing list, please visit the study web site at [www.highway26transportationstudy.ca](http://www.highway26transportationstudy.ca), or contact:

Comments and information regarding this study are being collected by the Ministry of Transportation in accordance with the *Freedom of Information and Protection of Privacy Act*. This material will be maintained on file for use during this study and aggregate survey statistical information could be included in future Environmental Assessment (EA) study documentation that may result from the recommendations of this transportation study. No personal information will be recorded during this survey and all survey information will be stored and then destroyed upon completion of any future EA/transportation studies.
